Dr. Eng. Margherita Galeazzi - employee, software developer;

Giuseppe Giorgetti - employee, full stack software developer;

Giuseppe Polverini - employee, full stack software developer;

# Our main products

# wokika®

enjoy the culture and knowledge

**wokika** is a dedicated, culture-specific social network that allows users to deepen and enrich their knowledge through artificial intelligence technologies as well.

**wokika** amplifies and multiplies access points to the world of beauty and emotions that only culture can offer.

**wokika** is free, shared, collaborative and multilingual social network, an open place where to find information about cultural works, allowing to expand and prolong the pleasure of culture, through interdisciplinary insights suggested by the social network community and artificial intelligence algorithms.

A place to be moved by admiring cultural content, engaging visitors with insights, curiosities, inviting them to enter into the history of the artwork itself, the places associated with it and the social, environmental, economic and architectural contexts surrounding it.

The meaning of a multilingual social network for wokika goes beyond spoken languages to embrace the languages and techniques that enable people with disabilities to interact.

We cooperate with the Italian Union of the Blind and Visually Impaired, to enable everyone to enjoy culture.

Born for scientific research, **SICO** has evolved and expanded to be a virtual assistant for clinical, administrative, clinical risk, diagnosis and treatment data management.

With artificial intelligence applications, SICO offers **predictive and early diagnosis** of rare cardiology and chronic bowel diseases.

*Don't just call it 'software'*

Each medical and surgical specialty has its own needs and peculiarities, which is why **SICO** has specific modules, each equipped with its own control systems to counter clinical risk and provide active support to health care personnel's requests for information

## **SURGICAL AREA**

Surgical Clinic  
Emergency Surgery  
Hepatobiliary and Transplantation Surgery  
Pancreatic Surgery  
Orthopedics and Traumatology  
Urology  
Anesthesia and Resuscitation  
Anesthesia and resuscitation  
of major trauma

## **MEDICAL AREA.**

Allergology  
Celiac disease  
Liver damage  
Dermatology  
Endocrinology  
Digestive endoscopy  
Gastroenterology  
Rehabilitation Medicine  
M.I.C.I.  
Neurology

## **MATERNAL AND CHILD AREA**

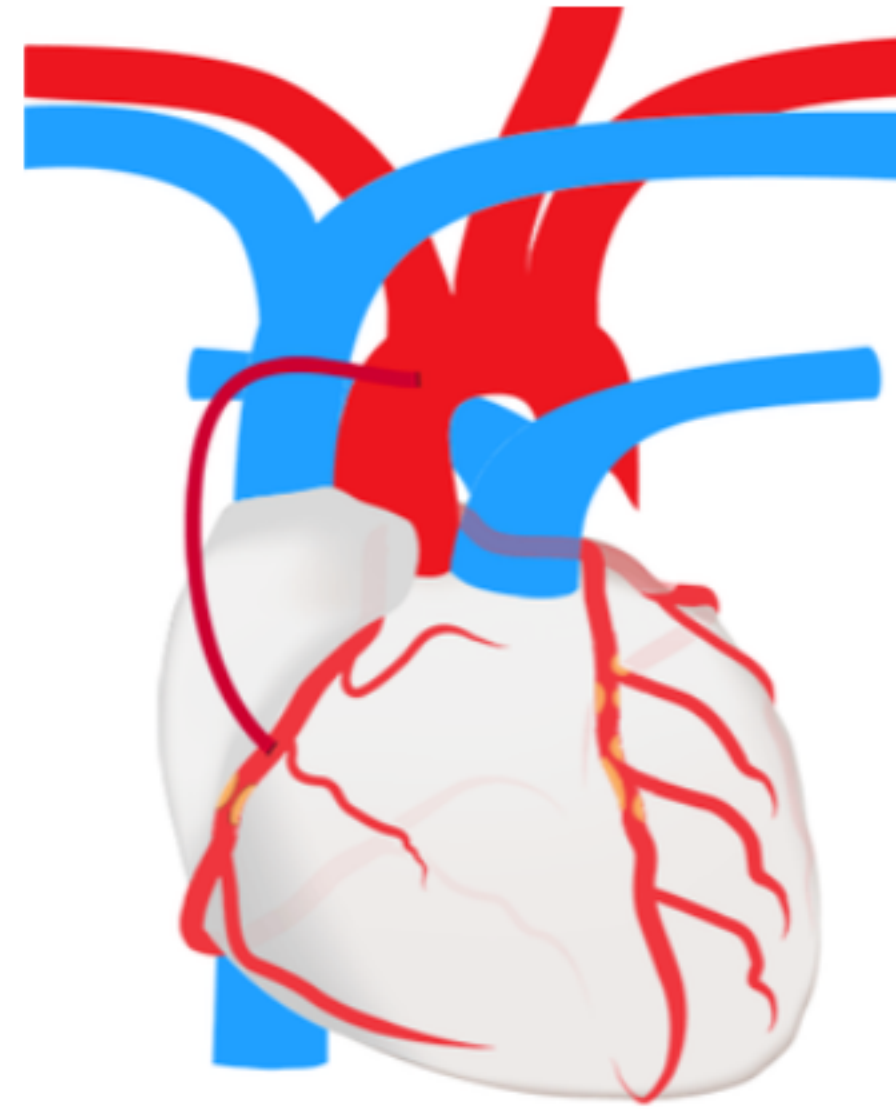

Pediatric Allergology  
Auxology  
Pediatric cardiac surgery  
Celiac disease  
Pediatric Hemodynamics  
Pediatric Gastroenterology  
Pediatric Orthopedics  
Pneumology  
Rheumatology  
Overweight and Obesity  
Kawasaki disease  
M.I.C.I.

## CARDIO - VASCULAR AREA

Cardiosurgery  
 Cardiology  
 cardiology and cardiac surgery prdiatics  
 Adult and Pediatric Hemodynamics  
 NICU  
 Kawasaki Disease  
 Cardiac Anesthesia and Resuscitation  
 Marfan Syndrome  
 Ehlers-Danlos Syndrome  
 Loeys-Dietz disease  
 Perfusion Service - Extracorporeal Circulation
